

For Anthony Cece and Vickie Foy,  
**stratum corneum  
comes firstum  
and foremostum.**

*A legacy of science. A love of skin.*

You could say that Unilever scientists Anthony and Vickie have a love affair with the stratum corneum. In their combined 22 years of R&D experience, they've added 11 skincare patents to our portfolio of more than 20,000. Anthony and Vickie are among 6,000 Unilever researchers on a mission to explore new and healthier ways to restore and repair skin. It's a mission we want to share with you—because together we can replenish the stratum corneum for us all. Join us at [StratumCorneumUnited.com](http://StratumCorneumUnited.com).

Can **John Bajor** ensure that Dove® cleanses while replenishing the **stratum corneum?**  
**Absoluteum.**

*John Bajor, PhD, R&D Specialist*

Senior researcher John Bajor and 1,000 other Dove R&D skincare specialists always strive for the perfect balance between cleansing and replenishing the stratum corneum. That's why Dove replenishes stearic acid, an essential lipid that is removed from the stratum corneum by most skin cleanser surfactants.

Since stearic acid is among the lipids lost most easily during cleansing, We formulated the stearic acid—enriched Dove® line of products to help your patients maintain healthy, hydrated skin. Want to learn more about John and his team? Visit the [StratumCorneumCollective.com](http://StratumCorneumCollective.com).

# Replenishing the stratum corneum togetherum.

We're proud to have amassed over 20,000 patents in skincare science—but without your partnership, our accomplishments are strictly academic. Here at the “university” of stratum corneum, you can learn more about our foundational skincare products, and incorporate them into your patients' care to help them maintain smoother, healthier skin.

*“I enable Vaseline products to heal the stratum corneum.”*

- Anthony Cece, MS
